

Special Issue

Battery Energy Storage in Advanced Power Systems

Message from the Guest Editors

In order to solve the shortage of traditional energy sources and the urgent need to improve environmental quality and accelerate decarbonization, advanced power systems using renewable energy generation and energy storage integration have received a wealth of attention from all over the world. The performance of the battery energy storage system greatly affects the efficiency and safety of the advanced power system. Therefore, the battery energy storage system plays a vital role in the safe and reliable operation of electric power systems, which includes researching new battery electrodes and electrolyte materials with high energy density and solid safety, developing a battery energy storage thermoelectric management system with excellent consistency, durability and safety, and optimizing the intelligent energy management strategy. Therefore, this Special Issue is focused on recent advances in battery energy storage materials, including electro-thermal management systems that address the above-mentioned aspects and go beyond the state-of-the-art.

About the Journal

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Editor-in-Chief

Prof. Dr. Karim Zaghib
Department of Chemical and Materials Engineering, Concordia
University, Montréal, QC H3G 1M8, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
