

## Special Issue

# Advanced Materials for Batteries

### Message from the Guest Editor

Research on new materials has constantly been driving the rapid development of energy storage and conversion technologies, such as Li-ion batteries, metal–air batteries, and next-generation batteries. In recent years, advanced materials have provided enormous opportunities to create batteries with higher energy density, better cycling performance, improved safety, lower cost, and longer cycling life. Research on novel materials will continue to grow and gain importance in more applications, including all-solid-state batteries. In this Special Issue, we focus on advanced materials directed towards applications in the battery field, especially in the advancement of electrode materials and new electrolytes, including, but not limited to, new anode materials, cathode materials, electrolyte additives, solid-state electrolytes, electrode additives, and interphases. This Special Issue aims to demonstrate the latest updates and future perspectives regarding advanced materials for batteries.

### Guest Editor

Dr. Yipeng Sun

Department of Mechanical and Materials Engineering, University of Western Ontario, London, ON N6A 5B9, Canada

### Deadline for manuscript submissions

closed (20 November 2023)

## About the Journal

### Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

---

### Editor-in-Chief

Prof. Dr. Karim Zaghib

Department of Chemical and Materials Engineering, Concordia  
University, Montréal, QC H3G 1M8, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
