

Special Issue

Nickel Metal Hydride Batteries 2017

Message from the Guest Editor

MDPI has recently published a compilation of 20 papers summarizing the research efforts in improving the performance of nickel metal hydride (NiMH) batteries prior to 2016 in a single volume. To continue to serve the NiMH research community, we are planning to extend the effort to collect the NiMH-related papers in another coming volume—also a Special Issue of the same journal (*Batteries*). Papers of review, current research, and future planning in the materials, fabrication methods, cell integration and development, performance evaluation, failure analysis, market opportunities, and other subjects related to NiMH batteries are invited. Discussions and comments prior to manuscript submissions are also welcomed. Dr. Kwo-Hsiung Young

About the Journal

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Editor-in-Chief

Prof. Dr. Karim Zaghib
Department of Chemical and Materials Engineering, Concordia
University, Montréal, QC H3G 1M8, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
