The Impact of Sport and Physical Activity on the Mental Health of Adolescents and Children

Message from the Guest Editors

Mental health can be considered a current worldwide pandemic, and it could be said that it has become a major public health concern, especially in a social context where people's relationships tend to be more virtual and less personal. Moreover, this disease has increased dramatically in recent years, in a post-Covid-19 era, in a social context in which numerous effects of the pandemic remain, like e.g. reduced physical activity and social relations, factors that paradoxically have been shown to be beneficial in stress and anxiety management. Physical activity and sports play a key role in promoting mental health, and these activities not only improve physical fitness, but also have significant impacts on the social, emotional, and psychological well-being. However, even the shown beneficial effects of physical activity on mental health, children and adolescent related investigations are less documented, and hence the importance of research in this field, especially since the future of the youth will depend heavily on their emotional and cognitive development and management, which will benefit from different sports practices and physical activity.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief

Prof. Dr. Jerrell Cassady

Department of Educational Psychology, Ball State University, Muncie, IN 47306, USA

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
