Cultural and Cross-Cultural Perspectives on Attitudes, Values and Social Axioms

Message from the Guest Editors

The aim of this Special Issue is to explore how social axioms, attitudes and values interact with and define individual behavior in all aspects of life as it stands within the current turmoil due to the constant shifting of environmental, societal, economic, political and personal demands, at the individual and cultural level. This Special Issue addresses how much—if any—personal values and social axioms contribute to the pursuit of an optimal way of life, as well as what individuals value as optimal, so that a “win-win” outcome may be reached, without harming others. We expect to shed some light on the choices people make when it comes to their academic, professional, social, political, personal and familial choices. By considering what is thought of as constructing, gratifying and valued, we hope to contribute to inhibiting the climbing percentage of NEETs (not in education, employment or training) and amount of aggression seen among adolescents.
