Approaches to Overcoming Selective Mutism in Children and Youths

Message from the Guest Editor

Children with selective mutism (SM) constantly avoid speaking in specific social situations. Often, they remain silent in school/kindergarten, while speaking normally to parents and siblings at home. SM is an anxiety disorder. These children's fear of talking, together with their resistance to pressure to speak, is similar to children with specific phobias. Just as resistance to the feared object of a phobia can be reinforced by well-intentioned attempts to make the child confront it, selectively mute children's resistance to speaking can become stronger by well-intentioned initiatives to challenge the child to speak. The condition interferes with learning and social communication and gets more and more ingrained the longer it lasts. Social interactions and participation in the classroom/kindergarten are crucial in overcoming SM. This Special Issue aims to explore approaches enabling children and youths with selective mutism to participate in learning activities and social interactions in kindergarten/school and in their spare time.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, Embase, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
