

# Special Issue

## Social Interactions and Aging

### Message from the Guest Editor

A large body of literature documents the importance of social interactions throughout the life-course. A special emphasis should be placed on the role that social interactions (or a lack of them) play in midlife and older adulthood. Social interactions are an invaluable source of emotional and instrumental support and are associated with cognitive function, physical, and mental health. The global pandemic and the restrictions on social gatherings that followed have made the subject of social relationships stand out as a main pivot for both research and popular media, and loneliness was described as another 'pandemic'. This Special Issue sets to focus on innovative research focusing on the unique role of social interactions in the second half of life. These include exploration of the role that social interactions play in older adults' lives, with a focus on physical, mental, and social health, family relationships, and friendships, on the one hand, and loneliness and social isolation on the other hand.

## About the Journal

### Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.
