

Special Issue

Healthy Even through Cancer—the Use of Narrations in Oncological Settings

Message from the Guest Editor

In the Special Issue “[Healthy even through cancer—What Are the Assumptions and Outcomes for Psychological Intervention](#)”, researchers pointed out that outcomes for psychological intervention derive from interaction not only between patient and the neoplasm, symptoms, therapies’ side effects, and postoperative diseases, but also between patients and emotional, social, and supportive experiences. In this regard, health entails the possibility of narrating and encompassing these interactions. Special Issue “[Healthy Even through Cancer—the Use of Narrations in Oncological Settings](#)” aims to address some outstanding questions from the previous Special Issue: What is a proper collection of critical data for cancer research and patient care regarding the narrations used by patients, health care professionals and caregivers? In what ways can narration supplement oncological information? What are the methods and the techniques used? What is the most critical and useful rhetoric in oncological field and in hospital settings. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief
