Intimate Partner Violence: A Focus on Emotion Regulation

Message from the Guest Editors

Intimate Partner Violence (IPV) encompasses physical, sexual, and psychological abuse, along with controlling behaviors exerted by one partner towards another (WHO & PAHO, 2012). IPV can have detrimental effects on an individual's physical and psychological well-being. Regarding the latter, it can contribute to symptoms of anxiety, depression, post-traumatic stress disorder (PTSD), substance abuse, and suicide attempts. Additionally, IPV can lead to the experience of painful emotions such as guilt, shame, and fear. In this context, emotion regulation, defined as the ability to effectively manage and modulate one's emotional experiences, appears to play a crucial role. Indeed, individuals with greater emotion regulation tend to exhibit higher psychological well-being. Despite this, many research questions remain unanswered. I therefore invite colleagues conducting research on IPV to submit articles addressing emotion regulation and related psychological constructs. Topics of interest include (but are not limited to):

- Emotion regulation;
- Trauma:
- Mental health issues (PTSD, depression, anxiety, etc.);
- Alexithymia.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: https://www.mdpi.com/journal/behavsci. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief

Prof. Dr. Jerrell Cassady

Department of Educational Psychology, Ball State University, Muncie, IN 47306, USA

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
