Special Issue

Examining Cognitive Processes of Decision-Making under the Perspective of a Dual-System Approach

Message from the Guest Editors

The goal of this **Special Issue** is to promote research from different perspectives that challenge or facilitate the dual system approach or utilize it to explore the processes underlying choice behavior and decision-making processes. We encourage submissions of empirical research from any theoretical perspective that falls broadly into one of the following areas. Submissions in related areas that include valuable discussions in these directions will also be considered.

- Hierarchy and priority of human motives (e.g., intuitive vs. rational; economic, vs. social).
- The use of the dual system approach to examine the cognitive processes underlying human decision making.
- Individual differences and the dual system approach (e.g., intuitive versus rational thinking style).
- The connection between the dual systems and contextual factors in affecting decision-making quality.
- Heuristics and biases under the dual system approach.
- Theoretical advancements in the dual-system approach or critical evaluation of it.
- Dual system-based practical interventions and remedies aimed at increasing optimal decisions.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Jerrell Cassady

Department of Educational Psychology, Ball State University, Muncie, IN 47306. USA

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
