## **Special Issue**

## Psychology of Mate Choice, Romantic Relationships and Sexuality

## Message from the Guest Editor

We are thrilled to announce a Special Issue, dedicated to exploring the psychology of human mate choice behavior, romantic relationships, and human sexuality. This issue aims to shed light on the factors shaping mate choice behavior, the inherent dynamics of romantic relationships, and the psychological foundations of human sexuality. Below is a nonexhaustive list of suggested topics/areas for submission for the Special Issue: - Factors influencing the choice of romantic partners (e.g., age, mating strategy, culture, personality, personal upbringing). - Factors affecting relationship satisfaction and dissatisfaction (e.g., mate value, sexual behavior, personality, expectations). -Psychological mechanisms underlying different mating systems and sexual behavior. By nurturing a deeper understanding of these domains, this Special Issue aims to advance the knowledge in the field. We encourage researchers to submit original research articles that offer fresh insights, contributing to scholarly discourse. We eagerly anticipate your contributions to this important endeavor.
