

Special Issue

Psychology of Mate Choice, Romantic Relationships and Sexuality

Message from the Guest Editor

We are thrilled to announce a **Special Issue**, dedicated to exploring the psychology of human mate choice behavior, romantic relationships, and human sexuality. This issue aims to shed light on the factors shaping mate choice behavior, the inherent dynamics of romantic relationships, and the psychological foundations of human sexuality. Below is a non-exhaustive list of suggested topics/areas for submission for the Special Issue: - Factors influencing the choice of romantic partners (e.g., age, mating strategy, culture, personality, personal upbringing). - Factors affecting relationship satisfaction and dissatisfaction (e.g., mate value, sexual behavior, personality, expectations). - Psychological mechanisms underlying different mating systems and sexual behavior. By nurturing a deeper understanding of these domains, this Special Issue aims to advance the knowledge in the field. We encourage researchers to submit original research articles that offer fresh insights, contributing to scholarly discourse. We eagerly anticipate your contributions to this important endeavor.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief
