Intersectionality and Health Disparities: A Behavioral Perspective

Message from the Guest Editor

We are organizing a Special Issue on "Intersectionality and Health Disparities: A Behavioral Perspective" in the Behavioral Sciences, an open access, peer-reviewed journal, indexed within Scopus, SSCI (Web of Science), PubMed and other databases. For detailed information on the journal, please refer to <https://www.mdpi.com/journal/behavsci>. This Special Issue on "Intersectionality and Health Disparities: A Behavioral Perspective" seeks to illuminate the complex interactions between various social identities and health outcomes. The behavioral perspective on intersectionality and health disparity emphasizes the critical role that individual and collective behaviors play in shaping health outcomes within the framework of intersecting social identities. This Special Issue aims to explore how behaviors influenced by intersecting social identities contribute to differential health outcomes across diverse populations. We can obtain complex insights into the underlying causes of health disparities by applying the intersectionality lens to behavioral patterns, coping mechanisms, and health-seeking behaviors.

Guest Editor

Dr. Hyunwoo Yoon

Department of Social Welfare, Institute of Social Welfare, Kongju National University, Gongju-si 32588, Republic of Korea

Deadline for manuscript submissions

30 April 2026
