

## Special Issue

# The Impact of Psychosocial Factors on Health Behaviors

### Message from the Guest Editor

There has been a lot of research investigating the prediction of psychological factors for health behaviors. The goal of these research studies must be to contribute to improving the health status in various populations by changing the psychological factors and thus health behaviors in a timely manner. However, this transition has not been very smooth since the relationship between psychological factors and health behavior or health behavior change is very complicated. Therefore, in this Special Issue of Behavioral Sciences, we welcome studies that successfully address these issues or limits, or imply potential solutions in the future, and that significantly expand the current level of understanding of the impact of cognitive, emotional, behavioral, and environmental factors on various health behaviors for improving the health status in populations. **Keywords** psychological factors  
cognitive factors  
emotional factors  
health behavior  
health seeking behavior

---

### Guest Editor

Dr. Hyoung Suk Lee

School of Interdisciplinary Arts and Sciences, University of Washington  
Tacoma, Tacoma, WA 98402-3100, USA

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Jerrell Cassady  
Department of Educational Psychology, Ball State University, Muncie, IN  
47306, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

##### Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2  
(Development)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
