Special Issue

Adolescent Self-Harm, Chronic Pain and Suicide

Message from the Guest Editor

Self-harm, suicidal behavior, and chronic pain in adolescents are very important public health concerns, associated with one of the main causes of death among young people as well as with many other negative consequences, such as mental health disorders, poor academic outcomes, social problems, and overall premature death. Additionally, the impacts of self-harm, suicidal behavior, and chronic pain may affect not only adolescents themselves but also their families, peers, schools, and communities. Hence, behavioral contributions to better understand and prevent these phenomena are of the utmost importance. Given these premises, this Special Issue aims at advancing the literature on adolescent self-harm, suicidal behavior. and chronic pain, from a behavioral sciences perspective and/or related fields and disciplines. Hence, we welcome theoretical and/or empirical contributions that extend knowledge on those factors. For more inforamtion, please visit: Special Issue "Adolescent Self-Harm, Chronic Pain and Suicide"

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: https://www.mdpi.com/journal/behavsci. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.
