The Relationship between Hemispheric Asymmetry and Personality

Message from the Guest Editor

We invite authors with an interest in personality, hemispheric asymmetry, and cognition to help us further explore this scientific frontier, as we seek to understand the interplay between personality and the brain. We are looking for results that replicate and extend previous research and results that offer new insights. We are open to exploratory and correlational research (as long as it is labeled as such) and hypothesis-driven and experimental research. We are open to contrary views that challenge our methods and hypothesis and theoretical and methodological papers that promise to enhance our field. We are willing to consider studies that incorporate diverse methods, such as using human handedness as a proxy for asymmetry, lesion studies, and imaging studies, as well as theoretical papers that integrate research across the field. We look forward to making 2024–2025 a year in which exciting new data offer new insights into the relationship between handedness and personality theory.

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Gianluca Serafini

Department of Neuroscience, Rehabilitation, Ophthalmology, Genetics, Maternal and Child Health (DINOGMI), Section of Psychiatry, University of Genoa, 16132 Genoa, Italy

Prof. Dr. Jerrell Cassady

Department of Educational Psychology, Ball State University, Muncie, IN 47306, USA

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 28.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2024).
