

Special Issue

Forensic and Legal Cognition

Message from the Guest Editors

The understanding of cognition in forensic and legal contexts has enormous implications on the fairness of justice systems. Decision makers, eyewitnesses and other individuals involved in justice are vulnerable to many different types of psychological biases and errors that can result in miscarriages of justice. In research, different legal actors are often treated separately, despite these actors utilizing similar cognitive processes. In this Special Issue, we invite you to submit your original work to *Behavioral Sciences* for our upcoming Special Issue dedicated to Forensic and Legal Cognition. The goal of this Special Issue is to explore interactions between psychological processes and forensic and legal contexts, thereby covering the cognition of a wide range of legal and forensic actors in one issue. We encourage a commensurately broad range of topics within this interdisciplinary fields. Examples of relevant areas include, but are not limited to, the following: eyewitness memory and testimony; cognitive bias in forensic analysis; juror and/or jury decision making; judge decision making; and cognitive factors in legal and forensic reasoning.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief

Prof. Dr. Jerrell Cassady

Department of Educational Psychology, Ball State University, Muncie, IN 47306, USA

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
