Special Issue

Employee Behavior on Digital- Al Transformation

Message from the Guest Editor

The rapid advancement of digital technologies and artificial intelligence (AI) is fundamentally reshaping industries worldwide. As enterprises increasingly integrate digital technologies and AI-driven solutions, understanding their implications for employee behavior becomes paramount. This special column in the Behavioral Sciences journal aims to explore and elucidate the multifaceted dynamics of employee behavior concerning digital-AI transformation.

Contributions are encouraged to address, but are not limited to, the following topics:

- Impact of digital-Al transformation on employee motivation, job satisfaction, and organizational commitment.
- Skills development and training programs required for employees to effectively utilize AI technologies.
- Evolution of job roles and responsibilities in response to Al integration.
- Ethical considerations surrounding Al adoption and their implications for employee behavior and organizational culture.
- Effects of Al-driven guest interactions on employeecustomer relationships and service delivery.
