

Special Issue

Healthy Even through Cancer— What Are the Assumptions and Outcomes for Psychological Intervention

Message from the Guest Editor

This Special Issue aims to provide a picture of the state-of-art of psychological support in oncology. What are the objectives of psychological support? And what are the outcomes? What are psychological interventions specific for cancer patients based on? How are these psychological interventions carried out? Furthermore, what are the theoretical assumptions valid for psychological intervention in oncology? Moreover, where does the psychological intervention take place? Are caregivers considered? Are health professionals considered? When should these roles be considered and how? Last, but not least, how is psychological support evaluated in oncology? We are pleased to invite you to contribute to this field. For more information, please visit the [Special Issue](#).

Guest Editor

Dr. Eleonora Pinto
