

Special Issue

Frontiers in Cyberpsychology: The Influences of Internet and Online Applications in Daily Life

Message from the Guest Editors

In current information technology, Internet and various online applications has been more and more popular. Under this background, the influences of Internet and online applications on users' adaptation has been a focus of researcher, and some important findings has been achieved. When taking into account the important role and various functions of Internet in our daily life, especially the fact that we couldn't live without Internet, it's of great significance to examine the people' regular use in daily life (this is normal for most users), how to balance the Internet and real life, and the new functions and applications of Internet . This special issue aimed to focus on these issues, research on regular Internet and online applications use (for example, social media, short video applications and live-streaming, online game, online communication, and online learning), from multi-disciplinary perspective and with various methods, are encouraged.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief
