Trauma Informed Research: Mental and Physical Health Consequences of Trauma on Marginalized Groups

Message from the Guest Editors

In recent years, there has been increased attention on the impact of trauma in the lives of individuals. However, there is a paucity of research that focuses on the impact that trauma and trauma-informed interventions have on the mental and physical health outcomes of individuals across their lifespan. Notably, there is a gap in the literature as it pertains to individuals with unique developmental needs, such as parents, children, adolescents, emerging adults, particularly from marginalized groups. Therefore, we invite papers that focus on trauma and trauma-informed interventions and their impact on people's mental and physical health outcomes throughout their lives. We are interested in scholarly submissions that acknowledge the unique context in which trauma takes place in the lives of individuals.

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2
(Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
