Understanding the Experiences of Pharmacological and Non-pharmacological Interventions for Chronic Illnesses

Message from the Guest Editors

The impact of COVID-19 has meant that, more than ever, understanding the perspectives of people is vital to enhancing interventions and accommodating needs. For instance, it may be that traditional patient reported outcome measures have a limited view of a concept or phenomenon that requires exploration in order to identify what, why, and how the intervention for chronic illness is having an effect. This Special Issue is put forward to capture new insights to the experiences of different interventions for chronic illness. We would like to capture a broad range of interventions that include pharmacological and non-pharmacological interventions for chronic illness. We encourage authors to consider this Special Issue if they have empirical or review-based studies that capture lived experiences and are able to reveal them in new and novel ways. This includes qualitative and mixed methodologies articles and reviews.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief

Prof. Dr. Jerrell Cassady
