Impulsivity, Cognitive and Empathic Dysfunctions in Perpetrators of Intimate Partner Violence against Women

Message from the Guest Editor

Cognitive and empathic dysfunctions seem to play an important role in intimate partner violence against women (IPVAW). Moreover, it has been hypothesized that impulsivity might mediate the relationship between these variables and proneness to violence.

Nevertheless, these conclusions are based on only a few studies that are limited in scope. Therefore, it is necessary to develop new research in this field to determine whether the associations between these variables are good predictors of a complex phenomenon like IPVAW. In this regard, there is a need to publish new manuscripts that analyze this topic and include new tools, such as genetic markers, hormonal parameters, psychophysiological variables, neuropsychological tests, and self-reports. It is extremely important to approach this issue from an integrative perspective. Thus, manuscripts with different perspectives are welcome that allow us to offer a broader perspective of a complex phenomenon while reducing biases in the interpretation of the results. For further reading, please visit the [Special Issue Website](#).

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief

Department of Educational Psychology, Ball State University, Muncie, IN 47306, USA

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
