Action Research, Methods and Measures in Community Psychology

Message from the Guest Editors

Community psychology aims to promote the well-being of individuals, social groups and communities, addressing issues from an ecological and multidimensional perspective. This means that to promote well-being at an individual level, it is necessary to deal with the interpersonal, organizational and collective levels of an individual's life. From this perspective, well-being must be considered in various human dimensions. Furthermore, well-being must be examined in relation to the phase of life, analyzing the most significant factors for children, adolescents, young people, adults or the elderly from time to time. Finally, from the perspective of the community, well-being is closely connected to factors that straddle the individual and collective spheres. On these bases, in this Special Issue, we welcome all contributions that, from the perspective of community psychology, offer research or intervention advances. More information please find in the Special Issue "[Action Research, Methods and Measures in Community Psychology](#)".

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief
