

Special Issue

Assessment and Intervention for Mental Health in Teenagers and Young Adults

Message from the Guest Editor

This Special Issue delves into the intricate interplay of psychological symptoms, emphasizing the significance of recognizing prodromal symptoms and the imperative nature of early treatment for teenager and young adults or individuals with at-risk mental state. This Special Issue serves as a multidimensional exploration of mental health, encompassing diverse aspects from prodromal symptoms to early treatment and health promotion. Additionally, it places a strong emphasis on health promotion initiatives tailored to mitigating the prevalence of psychiatric symptoms. Through the lens of preventive strategies and early treatment, the included studies explore novel avenues for enhancing mental health on a societal level, promoting resilience and fostering a holistic approach to well-being. In conclusion, this issue aims to provide a comprehensive overview of psychological and prodromal symptoms to bridge the gap between early signs and effective intervention strategies and foster a proactive paradigm in mental healthcare that underscores the importance of early treatment.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief

Prof. Dr. Jerrell Cassady
