

## Special Issue

# Relationships Between Autistic Traits and Other Psychological Characteristics

### Message from the Guest Editors

To tailor developmental, health, educational, and vocational support services specific to the needs of autistic individuals, a deeper culturally responsive understanding of the relationships between autistic traits and other psychological characteristics is urgently needed. This upcoming Special Issue of *Behavioral Sciences* is devoted to highlighting these unique relationships between autistic traits and other psychological characteristics, with an eye toward understanding how these interactions could shape supportive services aimed at autistic individuals when implementing neuro-affirmative and culturally and linguistically responsive care. Researchers and practitioners are encouraged to submit articles that focus on this intersection of characteristics and their real-life applications. We welcome innovative and novel research works, including critical and systematic reviews as well as qualitative and quantitative studies, on the above-mentioned topics.

### Guest Editors

Dr. Allison Gladfelter

Speech-language Pathology, Northern Illinois University, DeKalb, IL 60115, USA

Dr. Milijana Buac

## About the Journal

### Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.
