

Special Issue

Advanced Studies on Psychological Resilience to Suicidal Thoughts and Behaviors: Current Trends and Future Directions

Message from the Guest Editor

The aim of this Special Issue is to consolidate cutting edge research, theories, methodologies, and innovations in understanding the psychological resilience mechanisms underlying suicidal thoughts and behaviours across different populations. We invite contributions from mental health researchers, academics, mental health professionals, clinicians, psychologists, psychiatrists, social workers, data scientists, epidemiologists, public health policymakers, and early-career researchers. Authors are encouraged to adopt diverse methodologies and interdisciplinary perspectives, and to consider various individual, cultural, demographic, ethical, and socioeconomic contexts in their work. We welcome original research papers and review articles focusing on the following:

- Conceptual understanding;
- Psychological mechanisms;
- Considerations of individual-level interventions and system-level changes;
- Understanding and tailoring interventions across different populations.

Guest Editor

Dr. Kamelia Harris

Division of Psychology and Mental Health, School of Health Sciences, Manchester Academic Health Sciences Centre, University of Manchester, Manchester M13 9PL, UK

Deadline for manuscript submissions

31 December 2025
