Special Issue

Exploring New Frontiers in Psychometrics: Advancing Measurement of Skills and Behaviors

Message from the Guest Editors

This Special Issue aims to delve into the cutting-edge developments in psychometric assessment methods tailored specifically to measure skills and behaviors. The primary goal is to showcase innovative approaches and techniques that extend beyond conventional methodologies, enabling a more accurate and comprehensive evaluation of individual capabilities and tendencies. Through this exploration, this Special Issue seeks to identify emerging trends, address existing challenges, and propose novel solutions in the field of psychometrics. Moreover, it aims to foster interdisciplinary collaboration among researchers, practitioners, and experts from diverse domains to facilitate the exchange of ideas and promote the adoption of advanced assessment strategies. Ultimately, the objectives include advancing the theoretical foundations of psychometrics, enhancing the validity and reliability of measurement tools, and contributing to a deeper understanding of human skills and behaviors in various contexts. **Keywords:** psychometrics
measurement theory
advanced measurement approaches
skill measurement advancements
advancements in behavioral assessment

Author Benefits

High Visibility:
indexed within Scopus, SSCI (Web of Science), PubMed,
PMC, PsycInfo, and other databases.

Journal Rank:
JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2
(Development)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is
provided to authors approximately 29.6 days after
submission; acceptance to publication is undertaken in 3.4
days (median values for papers published in this journal in
the first half of 2025).
