Quality of Life of People with Intellectual and/or Developmental Disabilities: The Power of Context and Supports

Message from the Guest Editors

When people with intellectual and/or developmental disabilities (IDD) fight for their rights and act with self-determination, they nurture their sense of empowerment and improve their quality of life. To facilitate this quality-of-life enhancement, contexts and environments where people with IDD live and develop must provide for opportunities and deliver individualized support. In light of these premises, this Special Issue aims at advancing the literature on the role of contexts and supports in enhancing people with IDD quality of life. We therefore welcome theoretical and/or empirical contributions that broaden knowledge on those mechanisms leading to an improved quality of life through building positive environments and providing tailored and contextualized support.
