Reproductive Mental Health— Individual and Family Aspects

Message from the Guest Editors

For this Special Issue of *Behavioral Sciences*, we aim to present a collection of original articles and comprehensive reviews covering the psychological, physiological, and social conditions related to the mental health of women and men in this specific phase of life. Topics of interest to this Special Issue will relate to such areas as: changes in mood during periods of hormonal breakthroughs; prenatal and postpartum depression or anxiety in both men and women; emotions and cognitions related to reproductive failure; changes linked to menopause or andropause; protective factors that determine well-being throughout the reproductive phase of life; effects of mental health on human reproduction; scope and effects of psychological intervention. Find more details at: [Reproductive Mental Health—Individual and Family Aspects](#).
