Special Issue

The Role of Protein Complexes in Neurodevelopmental Disorders

Message from the Guest Editors

Many protein complexes have been reported by researchers that they play critical roles in brain development, and abnormal levels of these complexes lead to behavioral deficits in offspring in animal models; thus, they are implicated in neurodevelopmental disorders. Investigating the role of protein complexes in neurodevelopmental disorders can improve the mechanisms of these disorders and may improve the therapeutics of related diseases. In light of these premises, this Special Issue aims to present advanced studies about protein complexes involved in neurodevelopmental disorders. We welcome all submissions related to the topics mentioned above.

Author Benefits

High Visibility:

indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:

JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
