

## Special Issue

# Where Are We in Understanding Schizophrenia? From Bench to Bedside and Back

### Message from the Guest Editors

To elucidate the pathophysiological mechanisms underlying schizophrenia, develop more effective treatments with minimal side effects, and create services tailored towards the unique needs of patients, the field must incorporate data derived from studies using diverse research methods. We have therefore launched this special issue as a forum to publish studies from researchers employing a wide range of research methods and technologies to study schizophrenia. We welcome original paper, review, or meta-analysis based on animal and human studies. We will consider papers reporting observational, clinical trial, genetics, imaging, computational, health services research, ecological and in vitro data.

## About the Journal

### Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

---

### Editor-in-Chief

Prof. Dr. Jerrell Cassady
