Special Issue

Where Are We in Understanding Schizophrenia? From Bench to Bedside and Back

Message from the Guest Editors

To elucidate the pathophysiological mechanisms underlying schizophrenia, develop more effective treatments with minimal side effects, and create services tailored towards the unique needs of patients, the field must incorporate data derived from studies using diverse research methods. We have therefore launched this special issue as a forum to publish studies from researchers employing a wide range of research methods and technologies to study schizophrenia. We welcome original paper, review, or meta-analysis based on animal and human studies. We will consider papers reporting observational, clinical trial, genetics, imaging, computational, health services research, ecological and in vitro data.

Guest Editors

Dr. Olaoluwa Okusaga
Psychiatry & Behavioral Sciences, Baylor College of Medicine, Houston, TX 77030, USA

Dr. Consuelo Walss-Bass
University of Texas Health Science Center at Houston, Houston, USA

Touro University Nevada, Nevada, USA

Deadline for manuscript submissions

closed (28 November 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Jerrell Cassady
Department of Educational Psychology, Ball State University, Muncie, IN 47306, USA

Author Benefits

High Visibility:
indexed within Scopus, SSCI (Web of Science), PubMed, PMC, PsycInfo, and other databases.

Journal Rank:
JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.6 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2025).
