

## Special Issue

# Culturally Responsive Trauma-Informed Care

### Message from the Guest Editors

Trauma-Informed Care (TIC) is widely accepted as a standard for assessment and intervention that not only acknowledges but also respects and integrates the cultural values, beliefs, and practices of patients and families. However, relatively little has been discussed as to how different cultural dimensions may or should be considered in TIC and how the intersection between trauma and culture can inform service access and delivery, staff competency, organizational policy, as well as service outcomes. This Special Issue is interested in how cultural humility and sensitivity can be incorporated into elements and principles of TIC and what lessons we have learned to create culturally responsive trauma-informed practice and policy in the current care systems. For further information, please visit Special Issue "[Culturally Responsive Trauma-Informed Care](#)".

## About the Journal

### Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.
