

Special Issue

Violence and Bullying: Risks, Intervention, Prevention

Message from the Guest Editors

This Special Issue seeks to advance academic discourse on violence and bullying by bringing together research that explores both theoretical and applied perspectives. We invite submissions that examine the psychological, social, and structural determinants of aggressive behaviors, as well as those that evaluate intervention models and prevention frameworks across different settings. Particularly welcome are studies that investigate the role of digital technologies in both exacerbating and mitigating bullying, the impact of early-life experiences on aggressive tendencies, and policy-driven approaches aimed at fostering safer environments. Contributions employing qualitative, quantitative, and mixed-method approaches are encouraged, as well as interdisciplinary perspectives that integrate insights from psychology, social work, education, public health, and criminology.
