

Special Issue

Cooperation, Trust, and Reciprocity: Theory and Evidence from the Field of Behavioral Economics

Message from the Guest Editor

We welcome rigorous theoretical or empirical research, as well as comprehensive literature reviews, from the field of behavioral economics. Theoretical submissions may include the development of novel behavioral models, explorations of the evolutionary underpinnings of cooperative behavior, or innovative applications of established theories to new domains such as digital platforms. For empirical research, we encourage a broad spectrum of methodological approaches, encompassing laboratory and field experiments, neuroeconomic studies, and empirical analyses using observational or survey data. We are particularly interested in manuscripts that investigate specific, high-impact themes within this domain. These include, but are not limited to: (1) The psychological and social mechanisms governing the formation and breakdown of trust and reciprocity; (2) The dynamic behavioral processes driving the evolution of cooperation and trust within social structures; and (3) The role of institutions and social norms in shaping cooperative outcomes. Submissions offering thorough syntheses of the existing literature on focused topics central to these overarching themes are also welcome.

About the Journal

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Editor-in-Chief
