Deadline for manuscript
submissions:

closed (30 December 2022)

Message from the Guest Editors

The Special Issue "Featured Papers Wine, Spirits and Oenological Products Section" to be published in 2021 will present a collection of feature papers on recent developments in the production and quality of wines, spirits, vinegars and other oenological products, starting from grape maturity and harvest to the completion of alcoholic fermentation (and malolactic fermentation, if used, or acetic fermentation, for vinegar), distillation (for spirits), maturation, stabilization treatments and ageing.

The Special Issue seeks papers that feature original research, as well as review articles. The journal offers high-quality peer review and a rapid publication process. Submission to this Special Issue is now open and will remain open until 30 November 2021. Invited papers may be considered for full or partial waiver of the publication cost. If you would like to be invited to contribute to this Special Issue, please send the (tentative) title and abstract of your potential paper/review to the Guest Editor listed below. We are looking forward to receiving your contribution.
