

Special Issue

Featured Papers in Wine, Spirits and Oenological Products Section—Volume II

Message from the Guest Editors

Considering the success of the previous Special Issue, we are pleased to announce that we are launching a second Special Issue on this topic: "Featured Papers in Wine, Spirits and Oenological Products Section—Volume II". This Special Issue will continue to present a collection of feature papers on recent developments in the production and quality of wines, spirits, vinegars and other oenological products, starting from grape maturity and harvest to the completion of alcoholic fermentation (and malolactic fermentation, if used, or acetic fermentation for vinegar), distillation (for spirits), maturation, stabilization treatments and ageing. This Special Issue seeks papers that feature original research, as well as review articles. The journal offers high-quality peer review and a rapid publication process. If you would like to be invited to contribute to this issue, please send the (tentative) title and abstract of your potential paper/review to the listed below. We look forward to receiving your contribution.

Guest Editors

Prof. Dr. Stamatina Kallithraka

Department of Food Science and Human Nutrition, Agricultural University of Athens, Iera Odos 75, 11855 Athens, Greece

Dr. Matteo Marangon
