

Special Issue

Beverages Additives

Message from the Guest Editor

Beverage additives are the substances that may be incorporated, either directly or indirectly, during processing or storage; and, when introduced purposely, aid in processing or to preserve or improve the quality of a product. Additives are used for beverages to maintain or improve freshness, to improve product consistency, to improve or maintain nutritional value, to maintain palatability and wholesomeness, or to enhance flavor or impart desired color. Some natural additives of plant or animal origin to beverages can shape their health-promoting properties. The use of beverage additives requires appropriate control and sensory and consumer analyses. Original and review papers dealing with all aspects of beverage additives are welcome for inclusion in this Special Issue of Beverages. This issue will focus primarily on:

- Sweeteners, acidity regulators, colorants, flavoring agents, emulsifiers, stabilizers
- Nutrients
- Bioactives (natural antioxidants, natural antimicrobial agents, probiotics, prebiotics, phytosterols, omega-3 fatty acids)
- Sport, energetic, and coffee based drinks
- Analytical methods used for additive

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Edgar Chambers IV
Center for Sensory Analysis and Consumer Behavior, Kansas State
University, Manhattan, KS 66506, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), FSTA,
CAPlus / SciFinder, PubAg, and other databases.

Journal Rank:

CiteScore - Q2 (Food Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 24.1 days after
submission; acceptance to publication is undertaken in 6.6
days (median values for papers published in this journal in
the first half of 2025).
