

Special Issue

Fruit Juices: Technology, Chemistry, and Nutrition 2.0

Message from the Guest Editors

Fruit juices can be considered to be natural functional foods as, beyond their nutritional value, they can provide other compounds with potential health benefits. Fruit juice manufacturing techniques range from traditional methods. This Special Issue aims to present a collection of original research and review articles that provide new insights into, and data on, the technology, chemistry, and nutrition of fruit juices. Potential topics include: 1) evaluation of nutritional and bioactive compounds in conventional and newly designed functional fruit juices and blends that combine fruits and vegetables; 2) determination of the impact of conventional and new non-thermal processing technologies on bioactive compounds present in fruit juices; 3) assessment of the bioaccessibility and bioavailability of bioactive compounds in these beverages; and 4) unraveling the potential health effects of fruit juices using in vitro, animal, and human studies.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Edgar Chambers IV
Center for Sensory Analysis and Consumer Behavior, Kansas State
University, Manhattan, KS 66506, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Embase, FSTA, CAPIus / SciFinder, PubAg, and other databases.

Journal Rank:

CiteScore - Q2 (Food Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.7 days after submission; acceptance to publication is undertaken in 8.7 days (median values for papers published in this journal in the second half of 2025).
