

## Special Issue

# Health Beneficial Effects of Plant Beverages: From In Vitro to In Vivo Evidence

### Message from the Guest Editors

Non-alcoholic, non-dairy, plant-based beverages, comprise a growing segment of functional foods development worldwide. They stand out for a wide range of bioactive compounds comprising polyphenols, carotenoids, plant sterols, glucosinolates, and antioxidant vitamins with potential health benefits. New and advanced non-thermal processing technologies as well as fermentation may better preserve and even improve aspects of bioaccessibility and bioavailability in such beverages, which are important steps for their bioactivity. Thus, concerted efforts in applied research in functional beverages is required in coming years to prepare tailor-made plant beverages with proven health-promoting effects.

This Special Issue is intended to provide updated information through research papers and high-quality reviews on all aspects of the in vitro or in vivo biological activities of plant beverages in the fields of antioxidant and anti-inflammation activity, cancer prevention, and reduced occurrence of heart disease, neurodegenerative disease, and Alzheimer's disease, etc.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Edgar Chambers IV  
Center for Sensory Analysis and Consumer Behavior, Kansas State  
University, Manhattan, KS 66506, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), FSTA,  
CAPlus / SciFinder, PubAg, and other databases.

##### Journal Rank:

CiteScore - Q2 (Food Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 24.1 days after  
submission; acceptance to publication is undertaken in 6.6  
days (median values for papers published in this journal in  
the first half of 2025).
