

Special Issue

Volatile Composition of Drinks

Message from the Guest Editor

Volatile compounds present in drinks are important contributors to the flavor profile of the products, and therefore responsible of the acceptance or rejection of this foods by consumers. The present Special Issue pretends to comprise several studies to increase knowledge about 1) different methodologies to determine volatiles in beverages, 2) the contribution of the volatile compounds to the aroma/flavor of the drinks, 3) the presence of key compounds that might drive consumers' behavior, that can be used as shelf-life indicators, etc.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Edgar Chambers IV
Center for Sensory Analysis and Consumer Behavior, Kansas State
University, Manhattan, KS 66506, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), FSTA,
CAPlus / SciFinder, PubAg, and other databases.

Journal Rank:

CiteScore - Q2 (Food Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 24.1 days after
submission; acceptance to publication is undertaken in 6.6
days (median values for papers published in this journal in
the first half of 2025).
