

## Special Issue

# Wine Components and Chemical Mechanisms for Health

### Message from the Guest Editor

Dear Colleagues Three decades after the term “French Paradox” was coined, scientific studies continue to explore the complex relationship between the consumption of wine and health. This Special Issue aims to provide deeper insight into the potentially bioactive components of grapes and wine, and the biological and chemical mechanisms involved in any positive impacts of wine on human health. The nutritional aspect of wine's role, as part of a healthy diet and lifestyle, as well as sociological outcomes of its consumption, are also considered.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Edgar Chambers IV  
Center for Sensory Analysis and Consumer Behavior, Kansas State  
University, Manhattan, KS 66506, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), FSTA,  
CAPlus / SciFinder, PubAg, and other databases.

##### Journal Rank:

CiteScore - Q2 (Food Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 24.1 days after  
submission; acceptance to publication is undertaken in 6.6  
days (median values for papers published in this journal in  
the first half of 2025).
