

## Special Issue

# Fruit Juices: Technology, Chemistry, and Nutrition

### Message from the Guest Editors

Fruit juices can be considered natural functional foods since they can provide other components with potential health benefits such as fiber, vitamins, minerals and antioxidant phytochemicals, either naturally present or incorporated from extracts, raw or by-product plant foods. Fruit juice manufacturing techniques range from traditional methods such as blending, formulation and fermentation to advanced techniques designed to protect bioactive compounds, such as microencapsulation, edible films, coating and non-thermal processing technologies (high pressure processing, pulsed electric fields, etc.). Soliciting papers:

- evaluation of nutritional and bioactive compounds in conventional and brand new designed functional fruit juices
- determination of the impact of conventional and non-thermal new processing technologies on bioactive compounds present in fruit juices
- assessment of the bioaccessibility and bioavailability of bioactive compounds in these beverages
- unravel potential health effects of fruit juices considering in vitro, animal and human studies

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Edgar Chambers IV  
Center for Sensory Analysis and Consumer Behavior, Kansas State  
University, Manhattan, KS 66506, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), FSTA,  
CAPlus / SciFinder, PubAg, and other databases.

##### Journal Rank:

CiteScore - Q2 (Food Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 24.1 days after  
submission; acceptance to publication is undertaken in 6.6  
days (median values for papers published in this journal in  
the first half of 2025).
