

Special Issue

RNA and Protein Dynamics: Latest Advances and Prospects

Message from the Guest Editors

This Special Issue focuses on the latest advances in proteins and ncRNAs' interactions and functions. The topics of interest include, but are not limited to:

- Characterization of protein and RNA interactions.
- Description of ncRNA regulatory networks.
- Latest technical approaches to investigate protein and RNA function and localization.
- Databases to annotate interaction data sets.
- Bioinformatics tools to predict interactions or integrate data.

About the Journal

Message from the Editor-in-Chief

BioChem is an international and interdisciplinary open access journal encompassing the fields of molecular biology, cell biology, structural biology, nucleic acid biology, chemical biology, synthetic biology, disease biology, biophysics, and theoretical biochemistry. It publishes reviews, research articles, communications, and letters. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible.

Editor-in-Chief

Prof. Dr. Buyong Ma
School of Pharmacy, Shanghai Jiaotong University, Shanghai, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, EBSCO and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
