

Biomaterials in Bone and Cartilage Tissue Engineering

Guest Editors:

Prof. Dr. Thomas Jay Webster

Interdisciplinary Laboratory for
Advanced Materials (LIMAV),
Materials Science and
Engineering Graduate Program
(PPGCM), Federal University of
Piauí (UFPI), Teresina, PI, Brazil.

**Prof. Dr. Thiago Domingues
Stocco**

Bioengineering Program,
Scientific and Technological
Institute, Brazil University, São
Paulo, SP, Brazil

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

Tissue engineering is an interdisciplinary field that aims to regenerate and repair damaged tissues by combining cells, biomaterials, and growth factors. In particular, bone and cartilage tissue engineering have emerged as promising approaches for the treatment of various musculoskeletal disorders. Biomaterials play a crucial role in these tissue engineering approaches by providing a scaffold for cells to attach, proliferate, and differentiate, as well as by controlling the release of growth factors to promote tissue regeneration.

The Special Issue of the journal Bioengineering aims to provide a platform for researchers to share their latest findings and advances in the use of biomaterials for bone and cartilage tissue engineering. The scope of the issue includes the design, synthesis, and characterization of biomaterials, as well as their applications in cell culture, animal models, and clinical studies. Topics of interest include, but are not limited to, natural and synthetic biomaterials, scaffolds, hydrogels, micro- and nanofabrication, and drug delivery systems.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)
