Deadline for manuscript submissions:

30 June 2024

Message from the Guest Editor

This Special Issue, entitled "Polymeric Biomaterials for Wound Healing Applications," provides an in-depth exploration of the advancements, innovations, and applications of polymeric biomaterials in wound healing. Its objective is to discuss the development and utilization of various polymeric materials as scaffolds, dressings, or coatings to promote and enhance the wound healing process.

First, the properties of polymeric biomaterials that make them suitable for wound healing applications are discussed, including biocompatibility, biodegradability, and their ability to provide mechanical support to the wound site.

The recent advancements in the design and fabrication of polymeric biomaterials with controlled release capabilities are highlighted, which allow for the sustained delivery of bioactive molecules such as growth factors, antibiotics, and anti-inflammatory agents to enhance wound healing efficiency.

The challenges and future perspectives in the field of polymeric biomaterials for wound healing are also explored, including strategies to overcome limitations such as immune response, infection control, and wound chronicity.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2023).
