

Special Issue

Intelligent Health Management, Nursing and Rehabilitation Technology

Message from the Guest Editor

The emergence of intelligent health management, nursing and rehabilitation technology signifies a notable fusion of artificial intelligence, machine learning, and modern healthcare practices. This emerging domain aims to enhance traditional rehabilitation processes, refine precise health monitoring, and promote proactive management of chronic conditions. The integration of smart technologies enables real-time monitoring, personalized rehabilitation plans, and reliable clinical decision-making, thus advancing a patient-centric healthcare paradigm. This Special Issue welcomes original research and insightful reviews exploring the innovative frameworks, methodologies, and applications at the core of intelligent health management and rehabilitation technology. We are particularly interested in contributions that explore the integration of machine learning algorithms with rehabilitation technologies, the development of intelligent health monitoring systems, and the design of personalized rehabilitation strategies that leverage data analytics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
