

Special Issue

Advances in Stem Cell Differentiation: From Mechanisms to Therapeutic Applications

Message from the Guest Editors

We are pleased to serve as for this upcoming Special Issue, "Advances in Stem Cell Differentiation: From Mechanisms to Therapeutic Applications". This Special aims to highlight cutting-edge research that advances our understanding of how stem cells respond to diverse regulatory signals, as well as showcase how these insights can be translated into innovative therapeutic strategies. We invite you to contribute original research articles, reviews, or perspectives focusing on the role of physical cues in stem cell differentiation. Studies exploring the impact of substrate stiffness, topography, mechanical loading, electrospinning, 3D bioprinting, biomaterial design, and bioelectrical signals are particularly welcome. We are especially interested in work that uncovers the underlying mechanisms through which these physical factors influence lineage specification and functional tissue formation. We look forward to your contributions and to advancing the dialogue around the intersection of mechanobiology, biomaterials, and regenerative medicine.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
