

## Special Issue

# Recent Advances in Deep Learning: From Screening to Prognosis

### Message from the Guest Editor

In recent years, the extensive application of deep learning has enabled task-specific training in various clinical contexts via the utilization of diverse medical data, potentially providing novel personalized biomarkers. Indeed, various deep learning models have been reported to predict the prognosis or treatment response of patients and to broaden the prospects of opportunistic screening. This Special Issue aims to provide its readers with various novel approaches to the application of deep learning technology throughout the entire medical process, from screening to prognostication.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2024).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
